

08. Doors

Whether you're renovating an existing space or completing an addition, you'll want your doors to match throughout your home. We've attached a list of door styles to choose from and places to shop. If you want to paint or stain your doors, we will coordinate this with our painters – you will just need to choose the color of paint or stain. Refer to the paint section of this packet for more information about the difference between paint and stain.

In addition, you'll need to choose finish and style of hardware for your doors. If you want to match your existing doors, an easy thing to do is simply send your project manager a picture of an existing door and the hardware, they can help find a style to match.

Checklist:

- Door Style Selection
 - Wood/Masonite/Glass
 - Solid/Hollow Core
 - Style/Swing/Size
- Hardware
